INDEX TO VOLUME 6

The following indexes of authors and subjects cover the four quarterly issues of the sixth volume of *Policy Studies Review*. The four issues are numbered from page 1 through 810. The issues cover a variety of topics by way of the symposia, the nonsymposium articles, and the literature reviews. The symposia especially dealt with cross-national policy studies, world food sufficiency, governmental productivity, and natural disasters.

The Index of Authors covers authors of articles, authors of books reviewed, and reviewers of books, but not names referred to in the articles. The Index of Subjects mainly covers the basic concepts included in the title and subtitles of the symposium articles and the nonsymposium articles plus the titles of books reviewed. The bodies of the articles and the book reviews were also consulted to clarify the concepts derived from the titles. The page number after each concept is generally the first page or the main page on which the concept is discussed. The discussion may be continued on subsequent pages as well. Future annual indexes will appear in the first issue of each volume to cover all issues in the previous volume.
